Ellisse

Ellisse

Captivating and refined, Ellisse is the extendable sun awning that is the perfect synthesis between grace and structural performance. With a simple system for adjusting inclination, it is possible to adjust the areas of light and shade with maximum ease. Equipped with extendable arms and full closure, the awning structure is made of aluminium and the components of stainless steel.

The design of the award-winning box is elliptical, original and modern in shape and has made this awning a real point of reference among sun awnings.

Performance is guaranteed by the important test carried out in the Pininfarina Wind Tunnel.

Ellisse
