T-Hide

T-Hide

Equipped with an original arm tensioning system with motorized movement, it can vary from 10 to 40 degrees in inclination to improve sun protection and achieve sophisticated privacy. When closed, the awning transforms the box into a refined aesthetic detail that enhances and completes the architectural project.

Rationality and technology meet and are summarized in this extendable arm awning. T-Hide is an awning with box that can reach dimensions of 700 cm in width and 400 cm in depth. Designed for wall installation, it can be equipped with a concealed front volant, which can be operated with a multi-channel remote control and can be completed with a system of adjustable LED lights to modulate the brightness. All functions can be controlled by remote control or a high-performing smartphone application

T-Hide

TECHNICAL FEATURES

- Retractable arm awning with watertight protective box made of aluminium that can be installed on the wall or on the ceiling
- Winding tube Ø 78mm
- Arm slope from 10° to 40° (30° if provided with LEDs on the front profile and/ or motorized valance)
